

RECHARGEABLE LIGHT WARNING LIGHT

Product features

- Ability to work uninterruptedly for up to 35 hours when fully charged
- Light warning in 9 different modes
- Possibility of using it as an emergency flashlight with the white LED on it.
- Can be fixed to metal surfaces with neodymium magnet
- Full battery charge in 3-4 hours
- Easily applicable to traffic cones and delineators with hanging apparatus

It is a set of 6 for road closures, traffic accident points and emergencies.

It includes a 230V AC mains charging adapter and a 12V cigarette lighter charging adapter.

They can be used in almost any situation to draw attention to a dangerous situation.

Our rotor lights are equipped with a powerful magnet that you can stick to any metal surface. It allows you to quickly mark your faulty vehicle with light at night.

Sarix™ LED Technology

Signal Sarix™ technology is a high-performance Light Warning Device with industry-leading image uniformity. Sarix™ stands out with its high luminous power as well as energy saving.

Signal Sarix™ 5mm LED technology is uniquely produced with LEDs produced exclusively for Sarix™. It is designed to meet your expectations with its long durability.

Compatibility with Environmental Conditions

Each opilector (Light Warning Device) in the opilector set provides superior resistance to environmental conditions with IP65 level sealing and EN 12352 standard M4 impact resistance.

Ultra Sealing

Signal Light Road Lights constantly interact with environmental factors as they operate in the outdoor environment. Sarix™ Model is isolated against moisture, dust and air flow with a sealing level of IP 65. The opilector is designed with a gasket structure and increases product efficiency and lifespan with its structure that will not be affected by these variables.

- **Optional Equipment**
- Carrying bag with optional corporate logo or 4-pack carrying case cover
- Production in optional colors.

Signaling Electronics. Production and test reports are stored in the production files created for each product produced by Signalization Electronics, giving a special serial number for that product. In this way, control is provided over all production and testing stages of the product that will be intervened within the scope of warranty.

TEKNİK ÖZELLİKLER

Product code	Illuminated Warning Beacon
Source of light:	16 red, 1 white Ultra Bright LED (Optional colors available)
Battery	Rechargeable 3.7 V Li-iOn battery
APPLICATION	Turning points, vehicle stopping, accident points, emergency application
Functions	Light warning in 9 different modes, hanging bracket
Use	Traffic Warning and Safety
Power	3.7V Li-iOn Battery, rechargeable via 230 V AC or 12V car cigarette lighte
Measurement	ø110mm, 35mm height
Working Modes	Off / Quick Flash / Flip Flop Flash / SOS Signal / Steady On / White Light Flashlight / Rotating Lights / Steady On DIM / 4 LED Modes
Operation time	Up to 35 hours on full charge
